

# A Comprehensive Guide to Pro-Active Health Care for Cockateils

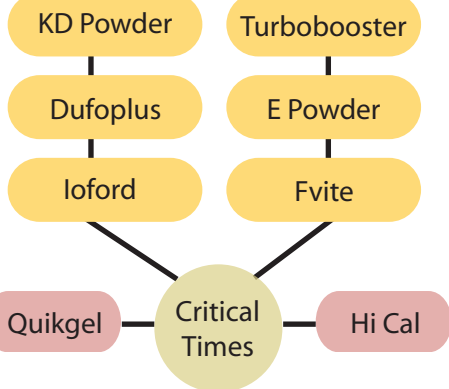

## NUTRITION

Quality seed is the foundation of your cockatiel's diet. We recommend our Sterile Seed as it is free from any contamination. Seed alone however, does not provide all of the necessary vitamins, minerals and trace elements necessary for superior health.

Seed & water supplements are recommended to ensure your birds nutritional needs are completely satisfied. These are given as part of the weekly routine.

### ONGOING HEALTH PROGRAMME FOR COCKATEILS

Strong Immunity & Natural Health

Ability to repel low grade contamination

## EMOTIONAL WELL BEING

Cockateils are highly social birds and form strong bonds with their carer. Interaction and play helps develop your bird's intellect and strengthens it's relationship with you.

Body Language

Vocalisation & Talking

It is important for you and your bird to understand your relationship with each other so that he/she understands its boundaries and role within the household.

Social Interaction

Security

Foraging opportunities

### TRAINING

Routine training sessions encourage your bird's desire to learn. Once established, these sessions are the ideal time to teach your pet new tricks.

Clean and disinfect the cage and food & water containers with KD Powder weekly.

## PHYSICAL WELL BEING

An annual health check is recommended for all birds.
